DYLAN DWIGHT

Remote · Relocating to New York City, spring 2027 | (347) 379-3273 | dylan@dylandwight.com
Portfolio: dylandwight.com · **LinkedIn:** linkedin.com/in/dylan-dwight

SUMMARY

Front-end developer and web designer who builds responsive websites for small businesses, from research and wireframes in Figma to HTML, CSS, and JavaScript. Redesigned an oceanfront restaurant's site within Shift4's website template and connected it to online ordering, reservations, gift cards, and its Google listing. Rebuilt an electrician's site from scratch in Astro.

TECHNICAL SKILLS

Front-end: HTML5, CSS3, JavaScript, mobile-first, accessibility, QA
Platforms: WordPress, Squarespace, Shift4 / SkyTab ecosystem
Workflow: Git, VS Code, Vercel
UX/UI: User research, wireframing, prototyping, UI design
Design tools: Figma, Photoshop, Illustrator
Local search: Google Business Profile, Search Console, SEO basics, analytics

SELECTED PROJECTS

Sand Dollar Restaurant & Lounge — Website Redesign

sanddollarrestaurant.com

Redesign · Front-End · Shift4 / SkyTab Integration · Local Search — Apr–Sep 2026; rehired for Oct 2026 remote refresh

- Redesigned the website of an oceanfront restaurant in Rockaway Beach, OR within Shift4's website template: new design direction, color, copy, and page structure, designed for phones first and then scaled up to desktop.
- Connected the site to SkyTab online ordering and gift cards, linked OpenTable and Shift4 reservations so bookings landed in the POS, and rebuilt the Google Business Profile to match the new site.
- Troubleshot the POS during live service and filed Shift4 support tickets and feature requests. Case study: dylandwight.com/work/

Shoreline Electric — Site & Brand System

shoreline-electric.com

Redesign · Front-End (Astro) · Accessibility · Live client site — Oct 2026 rebuild

- Built the first website for a licensed residential and commercial electrician on Canva, then redesigned it and rebuilt it from scratch in Astro so the business owns its code.
- Mobile PageSpeed lab test (Oct 27, 2026): performance score 55 → 100, main content on a phone in 1.7 s instead of 15.5 s, page weight 13.3 MB → about 1.9 MB, and 0 WAVE accessibility errors.
- Created the brand graphics, which were adapted for the company's service van wrap, carrying one identity across digital and physical media. Case study: dylandwight.com/work/

EXPERIENCE

Freelance Front-End Developer & Web Designer

2023 – Present

Independent — Remote

- Design and ship responsive client websites end to end: discovery, wireframes, UI design, build, launch, and ongoing maintenance.
- Work directly with small-business owners to turn business goals into site structure, page layouts, and clear calls to action.

Computer Repair Technician

February 2026 – September 2026

Computer Supports and Services LLC — Tillamook, OR

- Diagnosed and resolved hardware, software, connectivity, and performance issues, handled device setup and migration, and explained findings to non-technical clients in plain language.

Office Operations, Marketing & Graphic Design

Summer 2025

Pete Anderson Realty

- Produced listing materials, branded assets, and promotional pieces for the company's outreach.

EDUCATION & TRAINING

- **Portland Community College** — Web Design and Development coursework, 4.0 GPA; Honor Society and President's List (September 2024)
- **Neah-Kah-Nie High School** — High School Diploma, Rockaway Beach, OR (2023)
- **eCornell — Web Design and Development** (Cornell University Continuing Education), 6 CEUs
- **Google UX Design Professional Certificate** (Coursera) — in progress
- **IBM JavaScript Programming with React, Node & MongoDB Specialization** (Coursera) — in progress
