SUMMARY

UX/UI designer and front-end developer who designs and hand-codes responsive websites for real clients. Works across the front-end workflow, from user research and wireframes in Figma to responsive HTML, CSS, and JavaScript. Rebuilt an oceanfront restaurant's website and connected it to online ordering, reservations, gift cards, and its Google listing. Trained through eCornell, Portland Community College (4.0 GPA), and the Google UX Design and IBM full-stack JavaScript programs (in progress).

TECHNICAL SKILLS

Front-end: HTML5, CSS3, JavaScript, responsive design

UX/UI: User research, wireframing, prototyping, UI design

Design tools: Figma, Adobe XD, Photoshop, Illustrator, After Effects

Workflow: Git, VS Code, Vercel, Notion

Platforms: WordPress, Squarespace, Shift4 / SkyTab ecosystem

Practices: Accessibility, mobile-first, performance, cross-browser QA

Brand: Logo & identity design, print, layout, digital marketing

Local search: Google Business Profile, Search Console, SEO basics, analytics

SELECTED PROJECTS

Sand Dollar Restaurant & Lounge — Website Redesign

sanddollarrestaurant.com

Redesign · Front-End · Shift4 / SkyTab Integration · Local Search

Apr–Sep 2026 + Oct 2026 refresh

- Rebuilt the website of an oceanfront restaurant in Rockaway Beach, OR end to end: new design direction, color, copy, and page structure, designed for phones first and then scaled up to desktop.
- Connected the site to SkyTab online ordering and gift cards, and linked OpenTable and Shift4 reservations so bookings landed in the POS.
- Rebuilt the Google Business Profile so hours, menu, ordering links, and location matched the new site.
- Served as the owner's go-to troubleshooter for the POS during live service; filed Shift4 support tickets and feature requests.
- Rehired by the owner for a remote seasonal refresh in October 2026. Case study: dylandwight.com/work/

Shoreline Electric — Site & Brand System

shoreline-electric.com

Front-End Development · Graphic Design · Live client site

- Built the first website for a licensed residential and commercial electrician on Canva, mobile-first, with clear service breakdowns and prominent calls to action.
- Created the brand graphics, which were adapted for the company's service van wrap, carrying one identity across digital and physical media.

dylandwight.com — Personal Portfolio

dylandwight.com

UX/UI Design · Front-End Development

- Designed and hand-coded a responsive, accessible portfolio from scratch: design tokens, light and dark themes, type scale, and interaction states, with no framework or template.
- Deployed on Vercel with Git version control and preview deployments for every change.

Studio 54X — Photography Studio Concept studio54x.site

UX/UI Design · Front-End Development · eCornell course project

- Designed and built a multi-page concept site for a Finger Lakes photography studio during eCornell coursework, translating a visual direction into responsive pages and interactions.

Order-Ahead Coffee App — Google UX Case Study In progress

UX Research · Figma · Prototyping

- Mobile app and responsive website for busy coffee customers who order ahead. Work so far: competitive research, persona, journey map, storyboards, and low-fidelity prototypes.

EXPERIENCE

Freelance Front-End Developer & UX/UI Designer 2023 – Present

Independent — Brooklyn, NY / Remote

- Design and ship responsive client websites end to end: discovery, wireframes, UI design, hand-coded build, launch, and ongoing maintenance.
- Work directly with small-business owners to turn business goals into site structure, page layouts, and clear calls to action.
- Deliver supporting brand assets (logos, graphics, marketing collateral) so the website and physical branding stay consistent.

Computer Repair Technician February 2026 – September 2026

Computer Supports and Services LLC — Tillamook, OR

- Diagnosed and resolved hardware, software, connectivity, and performance issues; installed and configured software and handled device setup and migration.
- Explained technical findings to non-technical clients in plain language, with clear follow-up.

Office Operations, Marketing & Graphic Design Summer 2025

Pete Davidson Real Estate

- Ran day-to-day office operations: scheduling, client communication, records, and administrative workflow.
- Produced listing materials, branded assets, and promotional pieces for the company's outreach.

EDUCATION

- **Portland Community College** — Web Design and Development coursework, 4.0 GPA; Honor Society and President's List (September 2024)
- **Neah-Kah-Nie High School** — High School Diploma, Rockaway Beach, OR (2023)

CERTIFICATIONS & TRAINING

- **eCornell — Web Design and Development** (Cornell University Continuing Education), 6 CEUs: HTML, CSS, JavaScript, website optimization, and user experience design
- **Google UX Design Professional Certificate** (Coursera) — in progress: UX research, wireframing, and prototyping in Figma
- **IBM JavaScript Programming with React, Node & MongoDB Specialization** (Coursera) — in progress
- **Web Design Certification** — HTML semantics, CSS layout and animation, accessibility, and responsive frameworks
